Nicole Fisher, ASA, MAAA
Actuarial Director
KPNG, LLP
Austin, TX

Professional Background

I am currently an Actuarial Director in the KPMG Health Actuarial practice. I have over 20 years of experience in the health insurance industry, having held various actuarial roles in both industry and consulting. My expertise spans valuation, modeling, financial reporting, regulatory reporting, risk management, data governance, actuarial modernization, and pricing. Over the last 11 years at KPMG, I have led actuarial audit teams for several large health and life insurance companies, overseeing audit procedures over statutory and GAAP balances. I have also led multiple client engagements on accounting framework updates, model validations, technology modernization, data governance, actuarial transformation, process automation, experience studies, and the design and implementation of automated reporting frameworks.:

Society of Actuaries Experience

I have participated in several Society of Actuaries meetings as a moderator and presenter on various health topics, and I am currently participating in health committees as part of the American Academy of Actuaries. I am very interested in volunteering as a Committee member to give back to the profession that has provided me a career of rewarding experiences.

Other Relevant Volunteer Experience:

- Boy Scouts of America, Advancement Chair and Merit Badge Counselor
- Treasurer of Homeowners Association
- American Academy of Actuaries Committee Member

Why are you interested in leading this Community?

I am very excited to have the opportunity to serve as a Community Member as I feel the health insurance space is in a very exciting time of transition both in long duration and short duration products. We are experiencing a time of rapid change both in the technology world at large and within our profession. The evolution of AI and machine learning has the potential to transform our industry and the way in which we work, and I think it is pivotal in attracting younger members to the profession. Additionally, the advancements in technology and health treatments present a great opportunity for the health insurance industry to embrace this period. I am very excited to see how the health insurance space will be able to adapt to this changing environment.

I am also very interested in volunteering with this Community to meet more professionals in the health insurance space and expand my knowledge in new areas outside of those from which I have experienced through my various career roles. Health insurance is an exciting area of the actuarial profession largely due to the broad scope within which it operates. As such, I don't feel you can ever know everything about this space, and I have found the best way to learn is to meet new people in the profession and learn from their experiences. Hopefully, I will be able to reciprocate this by contributing to the Community through my past experiences and knowledge.

◆ ◆ ◆ ◆

Scott Fry, FSA
Principal Health Actuary
Amazon, Inc.
Seattle, WA

Professional Background

I am a health actuary with 15 years of experience across employer benefits consulting, ACA rate filing, value-based care, Medicaid managed care and currently I serve as the internal actuary for Amazon's employee medical plan.

Society of Actuaries Experience (Section and committee memberships and participation)

I was previously a grader, vice-chair, and then exam chair for the Predictive Analytics Exam between 2016-2025.

Other Relevant Volunteer Experience:

- I served as the Secretary, Treasurer, and President of the Portland Actuarial Club between 2016 and 2019.
- Volunteer tax preparer for AARP from 2018-2021.

Why are you interested in leading this Community?

I want the Health Community to serve as a valuable and trusted resource for actuaries that provides them with thoughtful research and information on the latest health trends and brings them into regular contact with the best thinkers on health topics. I bring a wealth of experience across different health actuary practice areas and believe my varied background will help me offer a useful perspective. I also believe my work on the predictive analytics exam will help bridge new techniques that are increasingly used in the health actuarial space.

Ann Pogrebitskiy, FSA, FCA, MAAA
Wakely Consulting
Denver, CO

Professional Background

I am a consulting actuary with over six years of healthcare experience at Wakely. I have broad expertise across multiple lines of business, including Medicare, Medicaid, and the Affordable Care Act (ACA) markets. I support a range of clients such as health plans, state agencies, and other healthcare stakeholders.

In my role, I work closely with clients to analyze data, evaluate trends, and provide insights that inform business and strategic decisions. This includes supporting projects related to financial performance, pricing, and overall program management. I have experience working in complex and evolving environments, helping clients navigate changing requirements and priorities.

Throughout my career, I have collaborated with both internal teams and external stakeholders, translating complex data into clear and actionable information. My experience across multiple areas of healthcare has strengthened my ability to think critically, adapt to new challenges, and communicate effectively with a range of audiences. Overall, my background combines analytical skills, practical consulting experience, and a broad understanding of the healthcare landscape.

Society of Actuaries Experience

I have been actively involved with the Society of Actuaries, particularly within the Health Section, where I have engaged in both professional development and industry collaboration. I regularly participate in SOA events and have had the opportunity to speak at SOA Health Annual Meetings, contributing to discussions on emerging healthcare trends and actuarial practices.

In addition to presenting, I have been involved in SOA volunteer committees, where I collaborate with peers across the industry to support research, develop content, and advance key initiatives within the health actuarial community. This volunteer work has allowed me to stay closely connected to evolving topics and contribute to the profession beyond my day-to-day consulting role.

Other Relevant Volunteer Experience:

I have additional volunteer experience through both professional and community-focused initiatives. I actively participate in forums organized by the American Academy of Actuaries, where I engage with peers on emerging industry topics and contribute to broader policy and actuarial discussions. This includes both healthcare industry emerging topics and soft skills such as communication and project management.

In addition, I volunteer with a local youth afterschool program, providing dance training to elementary school children. This program supports independence and enrichment for children in my local community.

Why are you interested in leading this Community?

I am interested in leading this community because of my strong commitment to professional engagement, knowledge sharing, and service, both within the actuarial field and more broadly. Through my involvement with the Society of Actuaries and the Health Section specifically, I have experienced and benefited from the value of an active and connected professional community.

I am especially motivated by the opportunity to create spaces where professionals can learn from one another. These experiences have strengthened my ability to lead inclusively, communicate effectively, and support others' development. Overall, I see this leadership role as an opportunity to contribute meaningfully, support professional growth, and help strengthen a collaborative and forward-looking actuarial community.
